

Company description

Let's build the new backbone of asset management!

Together with one of the largest insurance groups in Germany and one of the world's leading consulting firms, we are building an AI-based SaaS solution that supports credit analysts with credit risk assessments. We truly believe that we can build a new standard in asset management and change the entire industry for the better. Our company is still in stealth mode and we are currently looking for a Full Stack Developer to support our motivated team of Data Scientists, Software Engineers and Business Building Experts in Berlin. Join the ride!

Full Stack Developer – Development of an AI based FinTech Product

Role description

- Work in a multi-functional team with Product Owners, Engineers and leadership
- Build an application on a cloud platform using state-of-the-art technologies and frameworks
- Develop modules for a micro service-based architecture using Docker and server-less functions
- Get an overview over the complete processing pipeline of a modern, scalable application which uses machine learning to process various types of data
- Apply agile working methods and define technical standards
- (Further) develop and realize the technology and product based on customer feedback in close coordination with the rest of the Product Team

Key requirements

- Successfully completed Bachelor's or Master's degree in business informatics, computer science, mathematics, physics or related fields
- Good knowledge of one or more programming and scripting languages such as Python, Scala, C++, Java, JavaScript
- Have experience with cloud-computing and server-less development, ideally AWS-based

- Knowledge of DevOps practices and general software development, ideally including continuous integration and continuous deployment tools (e.g. Gitlab, Jenkins, etc.)
- Experience in agile development (Scrum), ideally already used ticketing systems and wikis (e.g. Jira, Confluence)
- Knowledge in the field of data modeling (e.g. SQL, NoSQL)
- Analytical and innovative way of thinking and joy of experimenting
- Fluent in English, German is a plus

Benefits

- Opportunity to shape the AI-based credit risk analysis of the future
- Development of a FinTech Start-Up, financed by industry relevant investors and partners
- Immediate start thanks to an existing interim tech team of >10 people
- Diverse activities and autonomous implementation of own ideas in a dynamic environment
- Sparring and support from top-class industry and technology experts from the investor and partner network
- First-class technical equipment and software of your choice
- Flexible working hours and an attractive salary and shareholder model
- Fully-equipped office in a renovated Victorian building with rooftop terrace and ideal connection to the heart of Berlin Mitte
- Feel-good vibes with fruit, snacks and drinks
- Annual, team off-site and regular team events

How to apply

We look forward to receiving your application with cover letter and curriculum vitae as well as details of your salary expectations and earliest possible starting date:
