

Company description

Let's build the new backbone of asset management!

Together with one of the largest insurance groups in Germany and one of the world's leading consulting firms, we are building an AI-based SaaS solution that supports credit analysts with credit risk assessments. We truly believe that we can build a new standard in asset management and change the entire industry for the better. Our company is still in stealth mode and we are currently looking for a Product Owner to support our motivated team of Data Scientists, Software Engineers and Business Building Experts in Berlin. Join the ride!

Product Owner – Development of an AI powered FinTech

Product

Role description

- ➔ (Further) development, realization and constant review of the product portfolio and vision
- ➔ Customer first! Development and promotion of a customer-centric mentality and highly professional mindset
- ➔ Continuous product iteration through intensive customer testing and targeted coordination with all company functions to ensure product/ market fit
- ➔ Management and prioritization of the product backlog for the multidisciplinary team of software engineers, UX designers and data scientists
- ➔ Making sure each product iteration optimizes the value of the product
- ➔ Promotion and assurance of an agile, user-centered working mode
- ➔ Creation of a high level product roadmap in collaboration with the leadership team and assurance that business-relevant milestones, such as prototype or MVP launches, are being delivered on time

Key requirements

- ➔ University degree in (business) computer science, economics, engineering or corresponding qualifications based on at least one year of experience as a Product Owner

- Built and launched digital products, ideally financial products or complex information software
- Enthusiastic about FinTech with an affinity towards trading software and asset management solutions
- Advocate of user-centric product development with in-depth methodological expertise
- Expert in agile development (mainly Scrum) and lean start-up methodology
- Good knowledge of Jira, Confluence and Jenkins
- Likes the vibe of an early stage start-up environment
- Feels passionate for and is proud of each product iteration
- High affinity for digital trends, e.g. AI, especially in the FinTech area; technical understanding of AI, particularly in the areas of machine learning, text mining and data modeling is a plus
- Creative personality with strong communication skills
- Fluent in English, German is a plus

Benefits

- Opportunity to shape the AI-based credit risk analysis of the future
- Development of a FinTech start-up, financed by industry relevant investors and partners
- Immediate start thanks to an existing interim tech team of >10 people
- Autonomous hiring of a long-term team that allows for early-on shaping of the company's culture
- Diverse activities and autonomous implementation of own ideas in a dynamic environment
- Sparring and support from top-class industry and technology experts from the investor and partner network
- First-class technical equipment and software of your choice
- Flexible working hours and an attractive salary
- Fully-equipped office in a renovated Victorian building with rooftop terrace and ideal connection to the heart of Berlin Mitte
- Feel-good vibes with fruit, snacks and drinks
- Annual, team off-site and regular team events

How to apply

We look forward to receiving your application with cover letter and curriculum vitae as well as details of your salary expectations and earliest possible starting date:
